

HOW TO USE HIKE BYTES INSIDER

STEP 1: OPEN MAP

- Open your custom Google Earth Map
- Switch to Satellite + 3D View
- Scan full terrain
- Note entry + exit points

STEP 2: STUDY TERRAIN

- Look at elevation + ridges
- Find water, cliffs, breaks
- Visualize the full route

STEP 3: PREPARE

- Download AllTrails offline
- Download Click + Go route
 - (before no service)
- Save Google Maps offline
- Charge phone + battery

STEP 4: CONFIRM ROUTE

- Match Google 3D to AllTrails line
- Identify steep / risky sections
- Confirm movement path

STEP 5: GO LIVE (FIELD)

- Open AllTrails GPS
- Follow route step-by-step
- Check landmarks as you move
- Use video snapshots if needed
- Adjust if terrain differs

STEP 6: SAFETY MODE

- Move slow in unknown areas
- Stop if unsure
- Re-check position
- Don't force route decisions
